

VIC-20[®]

THE WONDER COMPUTER OF THE 1980s

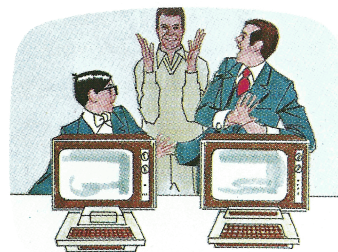

Commercial No. 3115

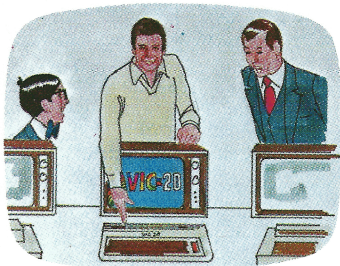

BOY: Compared to Atari, other video games just don't have it. . .

MAN: I think you'll find Intellelevision more realistic.

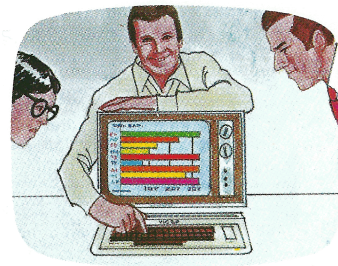

SHATNER: Gentlemen-- Move over

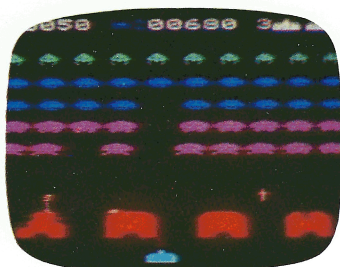

for my friend VIC.

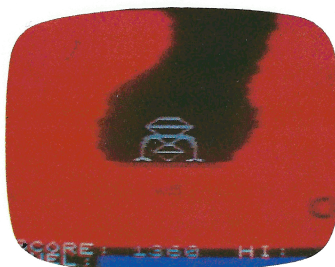

The Commodore VIC-20.

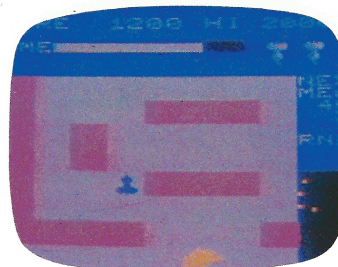

MAN: Move over?
SHATNER: The Commodore VIC-20 goes beyond your machines. It's a great computer that also plays great games.

like this. . .

and this. . .

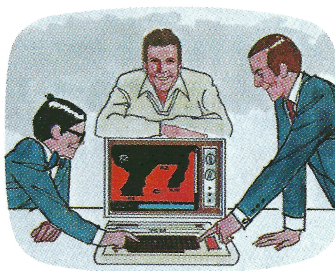

and this. . .

BOY: A computer that plays great games?

MAN: Under \$300. . .

SHATNER: Exactly.
BOY & MAN: We didn't know.

SHATNER: The Commodore VIC-20. My friend VIC. Under \$300, it's the first great computer that plays great games.
